

MAGNUM DYNALAB NEW PRODUCT INTRODUCTION

The MD309 and MD209 have met with accolades throughout the world for sonic excellence, build quality and cosmetics. Magnum Dynalab introduced the FT101 in 1985 to great acclaim but at that time we realized it was very hard to sell a stand alone or orphan product no matter how great it is? That was when the Etude was born and the company has never looked back but gone on to be the number one Tuner Company in the world.

We are committing ourselves to a new series of **Integrated Amplifiers** in the same way we have with FM tuners. We will provide top performance and value throughout the series. This allows a customer who loves the sound of the MD309 to buy the same sound quality at a lower entry level. The Hybrid series will exclusively use our TRACC audio technology first introduced in our world class leading MD109 tuner. Zdenko Zivkovic, the audio designer of the Hybrid Integrated series, is designing a brand new solid state amplifier platform for our new entry level MD301. This new 3 Series will hit critical retail price points of \$2000, \$4500, \$5500 and \$7500. The USB DAC will be an option on all models. Since all the models share the same chassis, except for the 301, it allows a very flexible upgrade path for our customers.

CURRENT MODELS:

MD309 - \$7500.00 CDN, \$8500.00 with USB DAC

MD209 - \$5500.00 CDN, \$6500.00 with USB DAC

NEW MODELS:

MD307 - \$ 5500.00 CDN, \$6500.00 CDN with USB DAC

- same performance, chassis and build as the MD309 without meters and LCD
- 225 watts per channel at 8 ohms
- Hybrid TRACC gain stage with Triode cryo-treated 6922 JJ tubes
- 40 Sanken output devices per channel – 1150 KVA Toroid transformer
- Remote control - Standard feet – upgradeable to 309

MD306 - \$4500.00 CDN, \$5500.00 with USB DAC

- same performance, chassis and build as the MD209 without tuner
- 125 watts per channel at 8 ohms
- Hybrid TRACC gain stage with Triode cryo-treated 6922 JJ tubes
- 20 Sanken output devices per channel- 650 KVA Toroid transformer
- Remote control
- Upgradeable to 307, 309 and 209

MD301 - \$2000.00 CDN, \$2600.00 with USB DAC

- new lower profile chassis
- 100 watts per channel at 8 ohms
- 12 Sanken outputs per channel
- Brand new solid state design
- Remote control
